

The 10 Building Blocks of Primary Care

Healthy Huddle Warm Up Tool

Background and Description

Huddles allow the team to meet briefly on a daily basis to discuss patients' needs and determine what tasks need to get done and by whom. The goal of the huddle is to rapidly review the charts of the patients on the day's schedule and make a list for each patient of missing information to retrieve prior to the visit and one of two care gaps to close while rooming the patient. A designated team member (usually the MA), in advance of the huddle, carefully "scrubs" the chart of every patient and makes a complete list of missing information and all the care gaps that could be closed for each patient during their visit. Once this list for the day is complete, the provider joins the other team members for the huddle in which the action list for each patient is prioritized based on the information collected.

The Huddle Warm-Up tool can assist in collecting missing information and identifying care gaps to present in the huddle for discussion by the team.

Instructions

This tool will assist with "scrubbing" charts. The name of the clinician, date, and team member completing the sheet is filled in at the top. For each patient, list the appointment time, an identifier, and fill in all relevant information for the patient. Bring the tool to the huddle to discuss each patient as a team.

UCSF Center for Excellence in Primary Care

The Center for Excellence in Primary Care (CEPC) identifies, develops, tests, and disseminates promising innovations in primary care to improve the patient experience, enhance population health and health equity, reduce the cost of care, and restore joy and satisfaction in the practice of primary care.

Acknowledgments

The UCSF Center for Excellence in Primary Care would like to acknowledge the following individual for her contribution to this work: Amireh Ghorob, MPH
